## Summary

Senior software engineer with 7+ years building APIs and developer platforms at Notion and Stripe. Focused on AI-native developer surfaces: MCP, agent tooling, and authorization standards for agents.

**Languages**: TypeScript, JavaScript, Python, Ruby, Java, Scala, C, C++.
**Platforms**: REST APIs, Model Context Protocol (MCP), OAuth 2.1, Cross App Access (ID-JAG), webhooks, Node.js, React.

## Experience

**Senior Software Engineer · Notion** · *San Francisco, CA* · Dec 2024 – present

*Developer Interfaces (formerly Public API), Developer Platform & Connections. Promoted to Senior (L4) in 2025.*

- Shipped Notion MCP, Notion's patent-pending hosted remote MCP server, now central to Notion's agent strategy. Partnered with OpenAI, Anthropic, and Cursor on launch integrations.
- Made Notion MCP 2x faster in one month (Oct 2026), also cutting Notion API event-loop delay by over 90%.
- Lead Tool Core: one shared tool module and execution engine behind the Notion API, MCP, CLI, and Custom Agents, so product teams build a tool once and it behaves the same on every surface.
- Built Notion's MCP App, embedding Notion as an interactive sidebar inside ChatGPT.
- Shipped Enterprise Managed Authorization (Okta Cross App Access) for Notion MCP with Anthropic and Okta.
- Shipped the File Upload API and integration webhooks, strengthening the platform's foundations.
- Consistently recognized for top-decile engineering velocity; gave an internal talk to early-career engineers on working effectively.

**Software Engineer · Stripe** · *South San Francisco, CA* · June 2020 – Nov 2024

- Built new business models and enterprise contract management support into Stripe Billing.
- Designed and implemented Stripe Tax integration for subscriptions and invoices.
- Evolved and maintained high-volume global recurring revenue APIs and infrastructure.

**Systems and Infrastructure Engineer Intern · LinkedIn** · *Sunnyvale, CA* · Fall 2019

- Designed API for storing metadata for third-party → LinkedIn HDFS big data ingestion.
- Built an internal web tool for onboarding data integrations, cutting onboarding from months to days.

**Engineering Intern · Stripe** · *San Francisco, CA* · Winter 2019

**Software Engineering Intern · Wish** · *San Francisco, CA* · Summer 2018

**Full-Stack Software Developer · Hootsuite** · *Vancouver, Canada* · Fall 2017

**Software Developer · Tangam Systems** · *Waterloo, Canada* · Winter 2017

**Software Developer · CANARIE** · *Ottawa, Canada* · Summer 2016

## Speaking, Writing & Community

- Speaker for Notion at WorkOS MCP Night 2.0 (San Francisco, 2025) and Postman's Agents & APIs Developer Meetup (New York, 2026).
- Author, "Notion's hosted MCP server: an inside look" (Notion engineering blog, 2025).
- Worked with Cloudflare on workers-oauth-provider improvements; contributor to MCP, A2A, and ACP communities and to the IETF OAuth identity assertion grant (ID-JAG) draft.

## Education

**Bachelor of Software Engineering, University of Waterloo** · *Canada* · 2015 – 2020

- Dean's Honours List every term for consistently averaging in the top 10%.
